## 6 Goods

Goods traffic is analysed from two different perspectives in this handbook. The first centres on actual port throughput, i.e. traffic that involves moving goods and passengers within the port premises, including imports, exports, transit, transshipments, and goods tares. The second focuses on foreign trade (import/export) on one hand, and domestic traffic on the other.

The Port Authority of Valencia is made up of the ports of Valencia, Sagunto and Gandia. However, for the purposes of this handbook, the PAV will be treated as a single operating unit. Thus, traffic figures will be accumulated for the three ports, although the port the goods belong to may be indicated where relevant.

## 2.7 TRANSPORT LINKS AND PORT MAPS

### 2.7.1 INTERNAL TRANSPORT LINKS AND LAND ACCESS

#### INTERNAL TRANSPORT LINKS AT THE PORT OF VALENCIA

##### Roads:

The port's internal road network is formed by a main perimetric trunk road from which access roads to the various quays branch off.

The main truck road is a dual carriageway while access roads to the various quays are single two-way roads.

The internal road layout is shown on the corresponding map.

##### Railways:

There is a two-track railway which runs parallel to the main road, and like the road, has tracks branching off to the different quays.

Within the port area, the rail tracks are laid on a ballast bed in some parts and are embedded in concrete in others, depending on whether vehicles need to go over them or not.

The network structure is shown on the corresponding map.

#### LAND ACCESS AND LINKS

##### PORT OF VALENCIA

The Port of Valencia is directly linked to national and international road and rail networks.

##### By road:

The Port of Valencia is connected to the A-7 and A-3 motorways and the rest of the national road network via the V-30 (Valencia bypass), providing road access to the entire Iberian Peninsula and Europe:

Access to local hinterland:

- To the north, towards Sagunto, via the V-21 and the A-7 motorways.
- To the south, towards Silla, via the V-31 motorway and the CV-500 road.

Access to the following corridors:

- North-South: including the A-7/AP-7/E-15 motorway from Barcelona-Algeciras, which provides access to:
- The regions of Aragon, Castile-Leon and the north of Spain via the A-23 toll-free motorway at Sagunto.
- The south of Castile la Mancha, via the A-35 toll-free motorway at Jativa.
- The southern Mediterranean coast via the AP-7 toll motorway.
- East-West: mainly via the A-3 toll-free motorway (Valencia-Madrid) which leads onto the A-43 toll-free motorway to Lisbon, on the stretch near Atalaya.

##### By rail:

Valencia's rail connections ensure access to any manufacturing area on the Iberian Peninsula and Europe.

The rail links from the Port of Valencia are as follows:

- Valencia - Barcelona - Port Bou
- Valencia - Zaragoza - Basque Country
- Valencia - Cuenca - Madrid
- Valencia - Albacete - Madrid. From Madrid, there are links to Extremadura and Portugal, as well as the north and northwest areas of Spain.
- Valencia - La Encina - Alicante road which also provides access to other destinations from Alcázar de San Juan (Andalucía) and Alicante (Murcia). "

##### PORT OF SAGUNTO

##### By road:

The Port of Sagunto is linked to the national road network via the V-23 toll-free motorway and the CV-309 road, providing access to:

- The northeast of the peninsula: from the A-23 toll-free motorway via the V-23 toll-free motorway.
- North-south corridor: the A-7 toll-free motorway via the V-23 toll-free motorway.
- Valencian coast: via the V-21 toll-free motorway, from the CV-309 and the V-23 toll-free motorway.

##### By rail:

The Port of Sagunto has rail infrastructure which connects the South Quay to the ArcelorMittal factory.

### PORT OF GANDIA

#### By road:

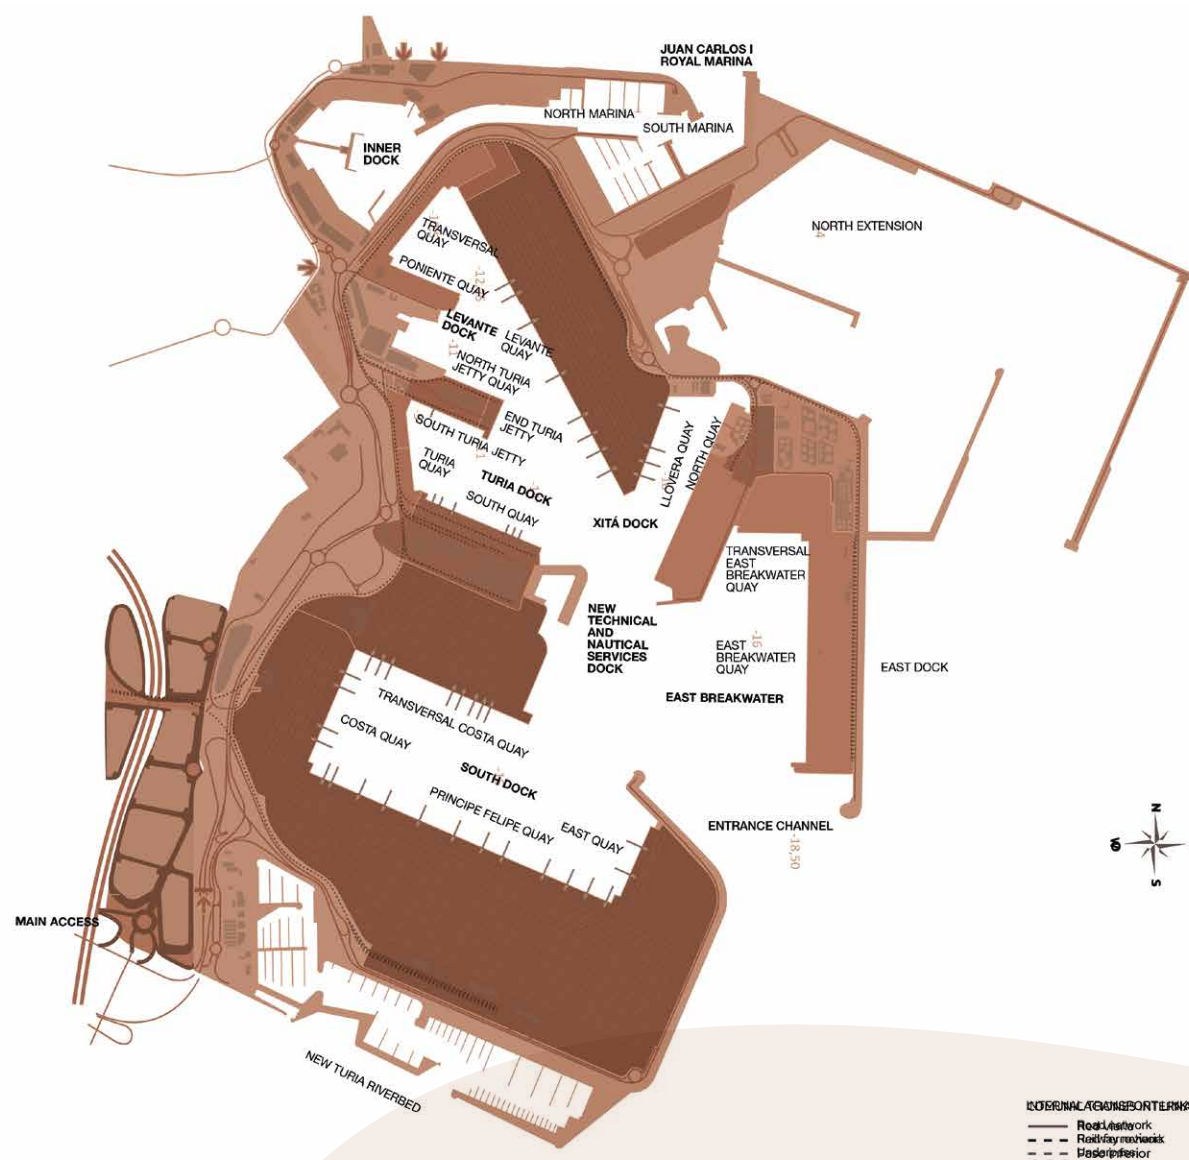

The Port of Gandia is connected to national road network via the N-337 leading onto the N-332 trunk road which then links up to:

- The AP-7/E-15 toll motorway via the Xeraco exit to the north and the Oliva exit to the south.
- The west of the Iberian Peninsula via the CV-60 road, which links up to the A-35 toll-free motorway.

#### By rail:

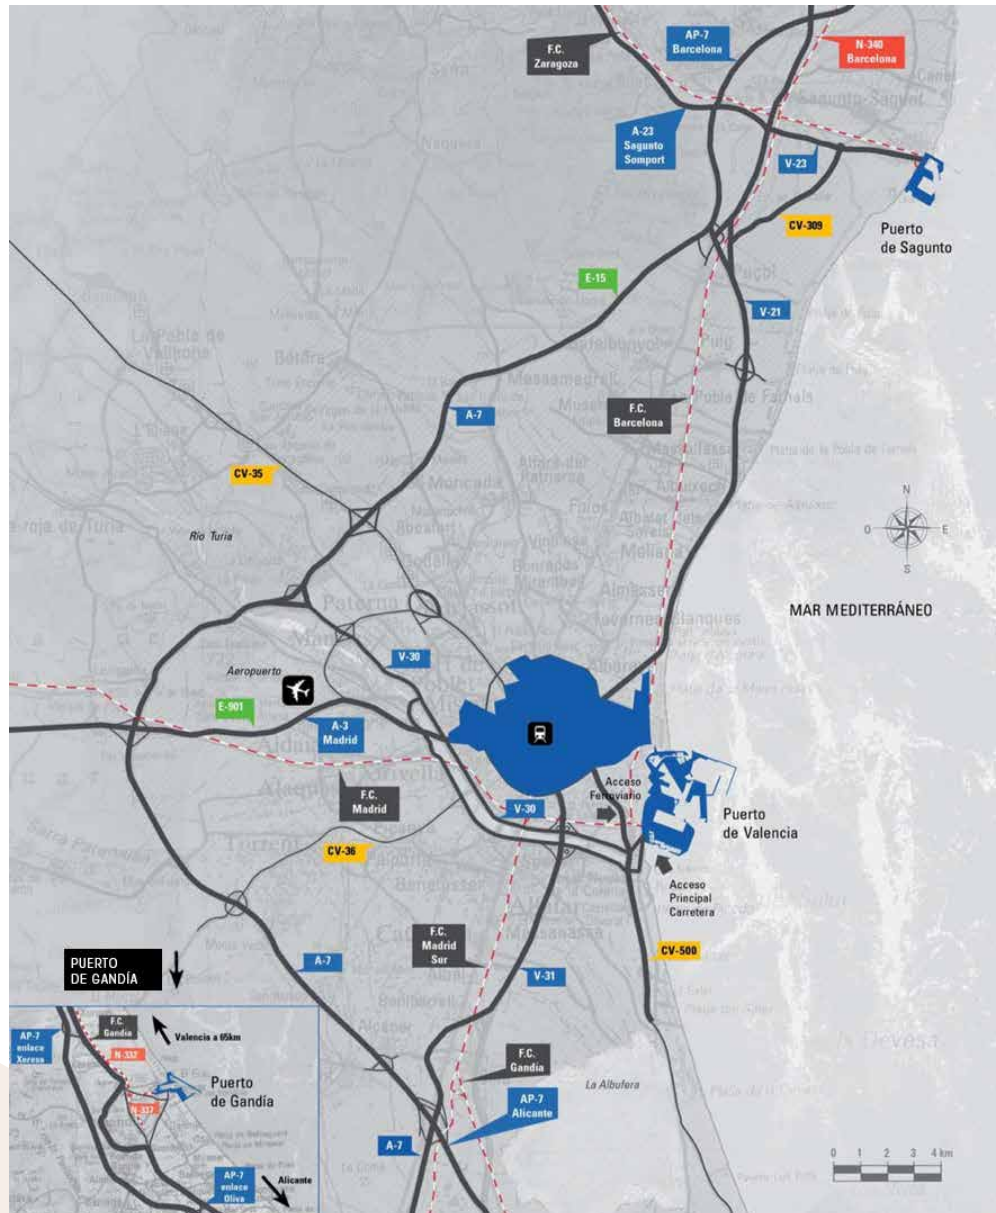

The Port of Gandia also has its own internal rail infrastructure which is linked to the national rail network.

## INFRAESTRUCTURAS EN EJECUCIÓN O PROYECTO Y FINES A LOS QUE SIRVE.

### Major investments in 2016:

#### RE-DESIGN OF THE SOUTH MOLE ROAD FOR THE NEW HEAVY GOODS TRAFFIC EXIT OUT OF THE MSC TERMINAL AT THE PORT OF VALENCIA

In preparation for the forthcoming relocation of the MSC terminal exit gates at the end of the South Quay, adjoining the nautical services dock, the South Mole road needs to be re-designed. A single-direction road adjoining the irrigation channel will be built, which, after crossing the rail lines, will run alongside the former BORAX concession until it joins the exit of the Transversal Costa road and reaches the South Quay roundabout.

Budget: 257,000.00 €

#### RAIL CONTROL CENTRE

The new building will consist of two floors above ground level, with a surface area of 240 m<sup>2</sup>, to house the personnel and equipment necessary for the regulation and control of railway traffic. It is located next to the South Rail Access.

Budget: 364,980.59 €

#### EXTENSION OF THE MSC TERMINAL TO THE EAST AT THE PORT OF VALENCIA

This work consists of extending the MSC Terminal Valencia by around 23.000 m<sup>2</sup> to the east. It involves building the necessary infrastructure, including a perimeter rockfill breakwater and its subsequent infill, as well as a similar superstructure to that of the existing terminal, i.e. laying the road surface and crane rails and installing all the service networks.

Budget: 6,691,258.79 €

### **COMPLETION OF THE BUILDINGS AT THE NEW NAUTICAL SERVICES DOCK AT THE PORT OF VALENCIA**

After the completion of the Nautical Services Dock in 2009, in 2011, the works needed to house the Dock users and to provide adequate access from the South Quay highway were begun. After the work stoppages imputable to the contractor, these works were finally completed in 2016.

Budget: 1,799,233 €

### **FILLING CORONATION IN A PLOT ON THE NORTH EXTENSION AT THE PORT OF VALENCIA**

This work includes the execution of an E-2 type esplanade coronation layer, formed by 1 m of stone in a 60,500 m<sup>2</sup> plot on the North Extension of the Port of Valencia, to house a storage concession for empty containers and a future road attached to it.

Budget: 861,534.06 €

### **PERIMETER FENCE AND ACCESS CONTROL FOR THE PORT-SHIP INTERFACE IN LINE WITH THE PORT OF VALENCIA'S SECURITY PLAN**

It consists of the enclosure through lifted barriers, sliding or swinging metal gates and fencing with New Jersey barriers in the surroundings of the Turia, South

and Xitá quays for their control, with the establishment of 19 accesses gates for vehicles. Includes three control centres and the adaptation of the Emergency Control Centre, equipped with communications and video surveillance systems, automatic gate and barrier opening systems, recognition by card and number plate, etc. It also includes the development of area, three new portable buildings and the networks for the new services.

Budget: 904,463.74 €

### **CONDITIONING OF THE NORTH BREAKWATER AT THE PORT OF GANDIA**

Once the protective rockfill has been improved, a pedestrian promenade has been built on it, open to the public, so that it is integrated with the promenade along the beach of Gandia. The work has aimed to promote and improve accessibility to the North Breakwater. Specifically, the work has been constructed of mixed concrete with passive steel reinforcements and structural synthetic fibres, fibres that ensure the durability of the structure and are not subject to the corrosion that can occur in marine environments. The walkway has a handrail on both sides, guaranteeing a view of the sea, enclosures in accesses and a ramp. The City Council of Gandia will be responsible for the surveillance, conservation and maintenance of the new walkway.

Budget: 1,326,675 €

The South Quay is used for importing and exporting steel coil, mainly for the SIDMED iron and steel plant, and also for discharging anhydrous ammonia using special equipment for the Fertiberia fertiliser factory in Sagunto.

The North Quay is currently used for shipping fertilisers to and from this factory, and for general cargo and Ro-ro traffic.

The Centre Quay has cold storage facilities for perishable goods. It also handles fertiliser traffic, conventional general cargo, and containerised general cargo.

Intersagunto Terminal operates out of the North Quay 2, and handles Ro-ro and container operations. On South Quay 2, new vehicles are loaded and discharged, whilst natural gas is discharged at the Saggas quay.

## Fishing Dock

This dock has a water surface of 13,000 m<sup>2</sup> and two 4.5 metre deep quays with berthing faces of 233 m and 119 m.

## TRANSPORT LINKS

### By road:

The Port of Sagunto is linked to the national road network via V-23 toll-free motorway and the CV-309 road, providing access to:

- The northwest of the Peninsula: Via the A-23 road through the V-23.
- The north-south corridor: the A-7 toll-free motorway in its Barcelona-Algeiras route and connecting with the A-23 toll-free motorway.
- Valencian coast: via the V-21, from the CV-309 and the V-23.

### By rail:

As for rail, the Port has infrastructure which connects with the ArcelorMittal company from the South Quay, not with the Public rail network (RFIG). On 20th February 2014, the favourable Environmental Impact Statement on Rail Access to the Port of Sagunto was published in the BOE. With the approval of DIA, the drafting process began for the construction project to connect the Port of Sagunto with the RFIG. In line with this access, the PAV has already designed its internal rail network to connect the terminals with the RFIG.

It should be noted at this point that the future logistics centre “Sagunto Mercancías” (managed by ADIF) will be located just 5 km south of the Port of Sagunto. The PAV has also planned access to this railway.

### Pipeline network

The SAGGAS regasification plant facilities are linked to the Barcelona-Valencia-Bilbao gas pipeline.

## 9.2 PORT OF GANDIA

The Port of Gandia is located 65 km south of the city of Valencia, and 110 km north of the city of Alicante. It has been managed by the Port Authority of Valencia since December 1985, as established in Spanish Royal Decree 2100/1985, of 23rd October.

It currently specialises in the import and handling of products such as paper in all forms (reels, pulp, etc.), chemical products, and perishable goods (refrigerated fruit) for import and export, as well as wood and wood products.

### FACILITIES

Its berthing facilities are shown in the following table:

	Length (m)	Depth (m)	Use

### TRANSPORT LINK

#### By road:

The Port of Gandia is connected to the national road network via the N-337 leading onto the N-332 trunk road which then links up to:

- The AP-7/E-15 motorway Xeraco exist to the north and Oliva exist to the south.
- The west of the Iberian peninsula via the CV-60 which links up to the A-35 toll-free motorway.

Initiatives aimed at improving road access to the Port of Gandia included the publication in the Official State Gazette on 7th February 2011 of a resolution of 25th January 2011, issued by the Department of Climate Change, containing the environmental impact statement for the N-337 road project, south access to the Port of Gandia from the N-332, kilometre 200+800, Valencia province. This is an essential project for the port of Gandia because it will enable access to the port from the N-332 trunk road, making transport links to the port easier and eliminating the need to cross the town of Gandia, via a direct link to the surrounding road network via the N-332 trunk road, which belongs to the public road network. The project was put out to tender and awarded in 2009 for €19,155,665.80 (including VAT), and was scheduled to be completed over a period of 32 months. Work began in 2015.

#### By rail:

The Port of Gandia also has its own internal rail infrastructure which is linked to the national rail network through the Gandia station, running through a heavily developed area.
