1. Introduction

In 2014, a total of 67,019,770 tonnes of traffic was handled (including fish catches and supplies), which represented a 3.09% increase compared to figures for 2013. The throughput of TEUs rose to 4,441,949 TEUs, which was 2.64% up on the previous year. Passenger traffic as a whole fell by 15.62%, with passengers travelling to and from the Balearic Islands dropping by 8.09%. The number of cruise passengers fell by 21.16%. Traffic throughput of vehicles shipped as goods increased to 495,323 units, i.e. 5.73% up on 2013.

A breakdown of goods traffic reveals that liquid bulk increased by 25.35% to 5,220,698 tonnes; solid bulk went up by 9.64% to 2,680,192 tonnes; conventional general cargo rose by 15.74% to 9,438,041 tonnes, whilst container traffic fell by 1.00% to a total of 49,289,732 tonnes.

7. Rail traffic

The Port of Valencia's rail connection ensures access to any production area on the Iberian Peninsula and Europe. There is a two-track railway inside the port premises which branches off to the different quays.

In 2014, 2,189,000 tonnes of goods were transported by rail, of which 1,056,000 tonnes were discharged from vessels whilst 1,125,000 tonnes were loaded goods. Total land traffic stood at 33,435,791 tonnes (excluding shipping transit and goods transported by pipeline). Thus, rail freight accounted for 6.55% of total land traffic. In terms of numbers of TEUs, a total of 136,386 TEUs were handled.

8. Goods

Goods traffic is analysed from two different perspectives in this handbook. The first centres on actual port throughput, i.e. traffic that involves moving goods and passengers within the port premises, including imports, exports, transit, transshipments, and goods tares. The second focuses on foreign trade (import/export) on one hand, and domestic traffic on the other.

The Port Authority of Valencia is made up of the ports of Valencia, Sagunto and Gandia. However, for the purposes of this study, the PAV will be treated as a single operating unit. Thus, traffic figures will be accumulated for the three ports, although the port the goods belong to may be indicated where relevant.

The tug boat service is considered as a port service according to article 127 of the recast text of the Spanish Law on State-owned Ports and the Merchant Navy, passed by Legislative Royal Decree 2/2011, of 5th September. It is provided when a user makes a request to the authorised service providers. Port authorities can also make the service compulsory if they consider that exceptional circumstances put port operations or safety at risk. The Harbourmaster's Office can also declare the compulsory nature of this service for safety reasons.

Company authorised to provide the service:

2.7. Transport links and port maps

2.7.1. Internal transport links and land access

Internal transport links

Roads

The port's internal road network is formed by a main perimetric trunk road from which access roads to the various quays branch off.

The main trunk road is a dual carriageway while access roads to the various quays are single two-way roads.

The internal road layout is shown on the corresponding map.

Railways

There is a two-track railway which runs parallel to the main road, and like the road, has tracks branching off to the different quays.

Within the port area, the rail tracks are laid on a ballast bed in some parts and are embedded in concrete in others, depending on whether vehicles need to go over them or not.

The network structure is shown on the corresponding map.

Land access and links to the Port of Valencia

The Port of Valencia is directly linked to national and international road and rail networks.

By road

The Port of Valencia is connected to the national road network via the V-30 (Valencia bypass).

The V-30 links up directly to the A-7 motorway (Mediterranean toll-free motorway) which in turn is directly connected to the other road links in the port's hinterland:

- » The V-21 trunk road to the north (Valencia-Sagunto).
- » The V-31 trunk road to the south (Valencia-Silla).
- » The north-south corridor which includes the A-38 (Valencia-Cartagena) and the A-7 (Barcelona-Algeciras) toll-free motorways.
- » The East-West corridor centred on the A-3 toll-free motorway (Madrid-Valencia) which connects to the A-43 road to Lisbon, on the stretch near Atalaya.
- » The section of the A-7 motorway near Sagunto links up to the A-23 (Sagunto-Somport) toll-free motorway which connects the region with Aragon, Castile-Leon and the rest of the north of Spain. The A-7 near Xativa also links up to the A-35 which accesses the south of Castile La Mancha.

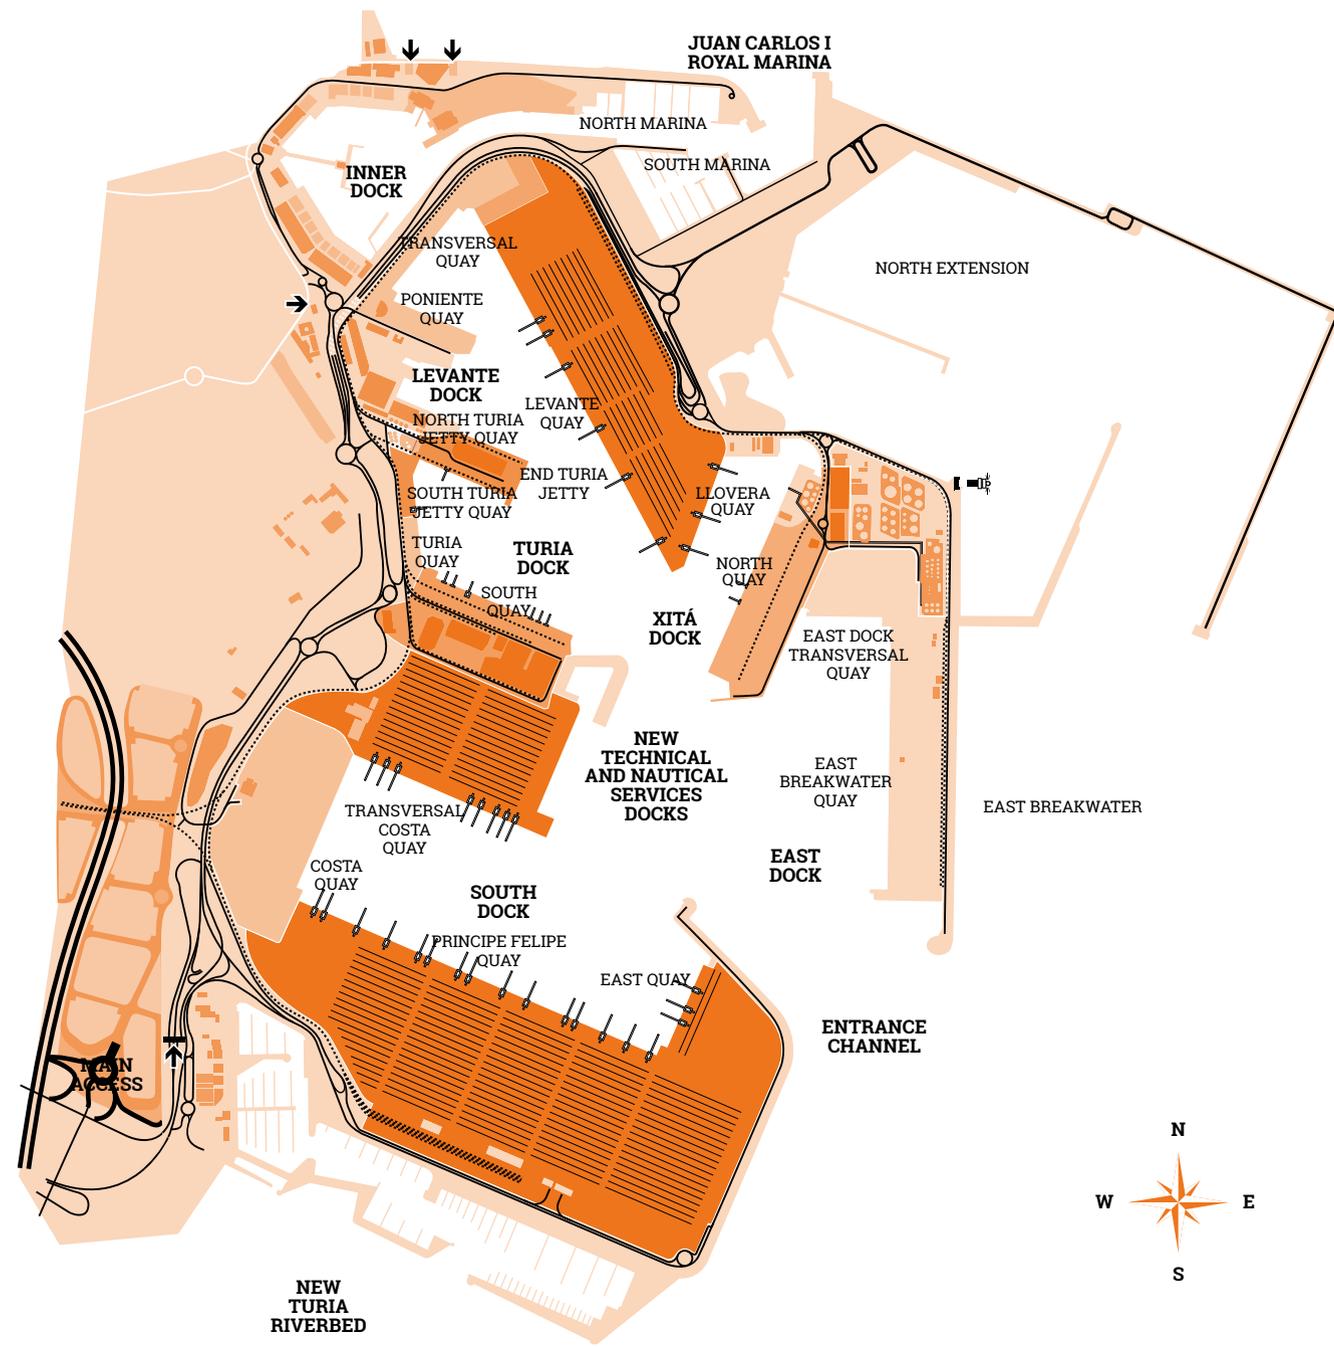

By rail

The rail connection from Valencia ensures access to any manufacturing area on the Iberian Peninsula and Europe.

The rail links from the Port of Valencia are as follows:

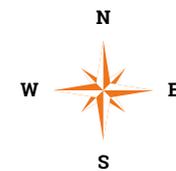

- » Valencia - Barcelona - Port Bou
- » Valencia - Saragossa - Basque Country
- » Valencia - Cuenca - Madrid
- » Valencia - Albacete - Madrid. From Madrid, there are links to Extremadura and Portugal, as well as the north and northwest areas of Spain.
- » Valencia - La Encina - Alicante, which provides connections to go on to other destinations from Alcazar de San Juan (Andalusia) and Alicante (Murcia).

The ports of Sagunto and Gandia

9.1. Port of Sagunto

The Port of Sagunto is located 22 km north of the city of Valencia and has been managed by the Port Authority of Valencia since 1985, as established in Spanish Royal Decree 2100/1985, of 23rd October.

Facilities

1. Commercial docks

The two commercial docks at the Port of Sagunto have a water surface of around 220 hectares, made up of 5,103 linear metres of berthing faces, distributed as follows:

	LENGTH (m)	DEPTH (m)	USES
DOCK 1			
North Quay 1	489	9.00	General cargo, fertilisers, containers, and Ro-ro traffic
Centre Quay 1	620	11.25	General cargo, containers, and Ro-ro traffic
South Quay 1	580	10.00	Liquid bulk using special equipment, general cargo
Service Quay	171	4/8	
Northeast Quay	335	14	
DOCK 2			
Centre Quay 2	231	16.50	New vehicles
South Quay 2	247	16.50	New vehicles
North Quay 2	650	16.50	Containers / Multipurpose Quay
Saggas Quay	330	14.00	Regasification plant
OTHER QUAYS			
Jetty	270	14	Not in use
Dry dock-Shipyard	240	4.50	Dry dock – Shipyard
Levante	940	14.00	

The Port of Sagunto has 937,573 m² of open air storage space and 115,199 m² of warehouse space, making a total of 1,159,449 m². It also has a 65,000 m³ cold storage warehouse. It is equipped with the following cranes:

TYPE OF CRANE	NUMBER	LIFTING CAPACITY (t)
Gantry/Pallets	2	16
Gantry	2	20
Gantry	2	36
Gantry	2	60
Mobile	2	
Mobile	2	100/120
Mobile	2	100/104
Mobile	2	100

The South Quay is used for importing and exporting steel coil, mainly for the SIDMED iron and steel plant, and also for discharging anhydrous ammonia using special equipment for the Fertiberia fertiliser factory in Sagunto.

The North Quay is currently used for shipping fertilisers to and from this factory, and for general cargo and Ro-ro traffic.

The Centre Quay has cold storage facilities for perishable goods. It also handles fertiliser traffic, conventional general cargo, and containerised general cargo.

Intersagunto Terminal operates out of the North Quay 2, handling Ro-ro and container operations. On South Quay 2, new vehicles are loaded and discharged, whilst natural gas is discharged at the Saggas quay.

Fishing dock

This dock has a water surface of 15,000 m² and two four-metre deep quays with berthing faces of 140 m and 120 m.

Transport links

By road

The Port of Sagunto is linked to the national road network via the N-237 road, the N-234 (Sagunto-Burgos) road and the N-340 (Barcelona-Cadiz) road, which provides access to the AP-7 Mediterranean toll motorway.

By rail

The Port of Sagunto has its own private rail network, which belongs to Arcelor. This links up to the national rail network via the South Quay.

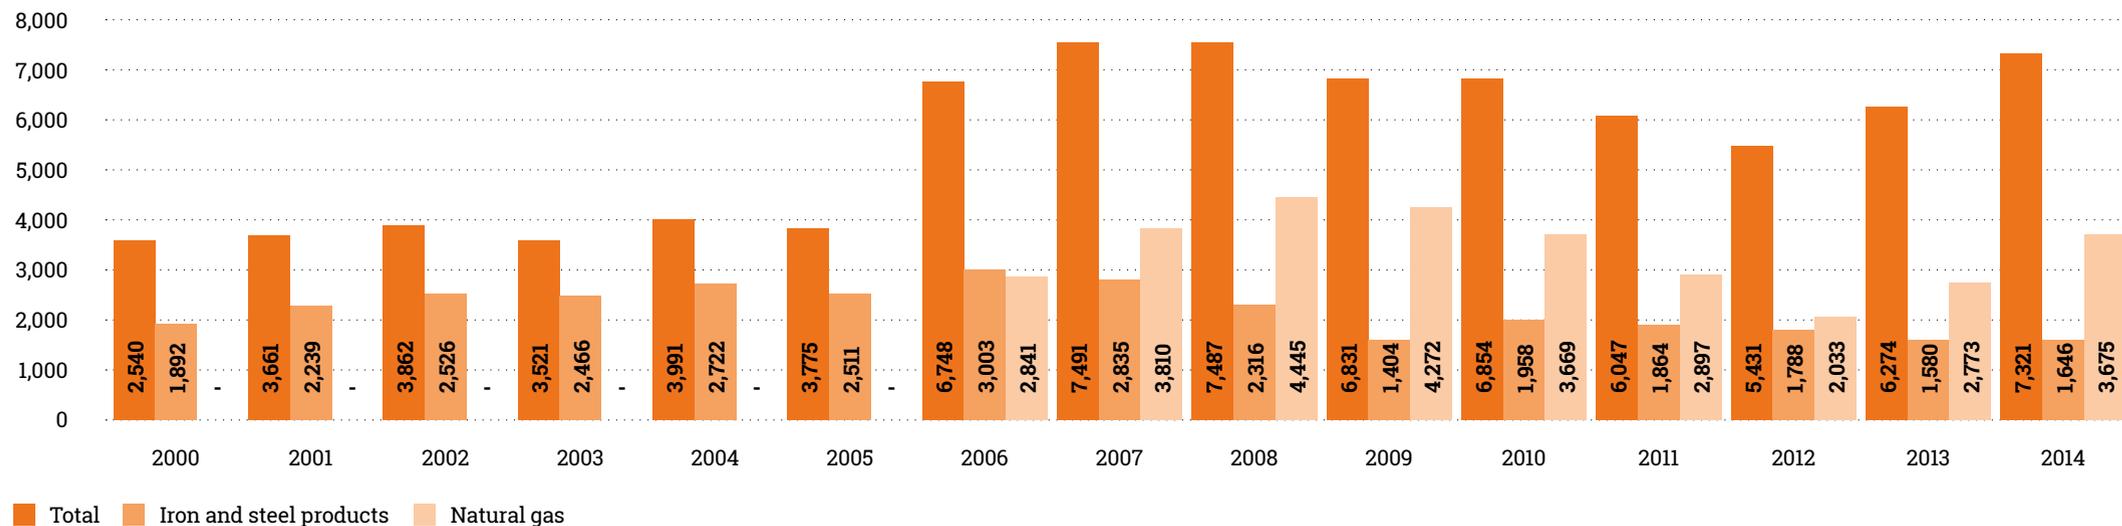

Pipeline network

The SAGGAS regasification plant facilities are linked to the Barcelona-Valencia-Bilbao gas pipeline.

Traffic

Traffic at the Port of Sagunto

Transport links

By road

The Port of Gandia is linked to the N-332 via the N-337 A-road. It is linked to the AP-7 toll motorway at Xeraco (north) and Oliva (south) via the N-332 A-road.

The Port of Gandia is also linked to its hinterland via the CC-320 road from Almansa to the Grao de Gandia.

Initiatives aimed at improving road access to the Port of Gandia included the publication in the Official State Gazette on 7th February 2011 of a resolution of 25th January 2011, issued by the Department of Climate Change, containing the environmental impact statement for the N-337 road project, south access to the Port of Gandia from the N-332, kilometre 200+800, Valencia province. This is an essential project for the Port of Gandia because it will enable access to the port from the N-332 trunk road with a direct link to the surrounding road network via the N-332 trunk road, which belongs to the national road network. This will improve transport links to the port, eliminating the need to cross the town of Gandia. The project was put out to tender and awarded in 2009 for €19,155,665.80 (including VAT), and was scheduled to be completed over a period of 32 months. However, at 31st December 2014, the work was still suspended.

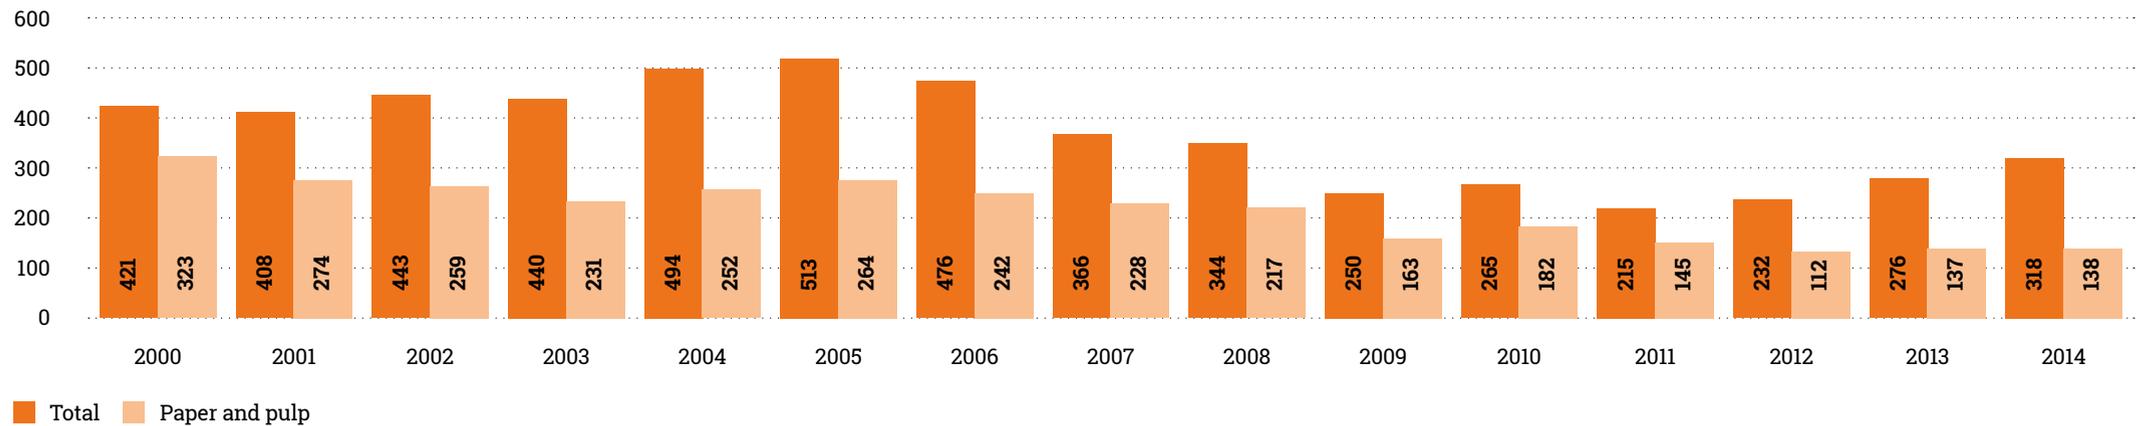

By rail

The Port of Gandia also has its own internal rail infrastructure which is linked to the national rail network.
