During the year, a total of 4,615,196 TEUs were handled, which was 3.9% up on the previous year. Passenger traffic rose by 7.57% to 744,923 passengers. The number of ferry passengers went up by 16.93% whilst cruise passengers rose by 0.42%. Throughput of vehicles shipped as goods increased significantly to 689,426 units, mainly as a result of exports. This represented a 39.19% rise on the previous year.

A breakdown of goods traffic reveals that liquid bulk went down by -26.94% to 3,814,375 tonnes; solid bulk went up by 0.17% to 2,684,864 tonnes; conventional general cargo rose by 14.8% to 10,834,853 tonnes, whilst container traffic grew by 6.04% to a total of 52,267,244 tonnes.

6. Goods

Goods traffic is analysed from two different perspectives in this handbook. The first centres on actual port throughput, i.e. traffic that involves moving goods and passengers within the port premises, including imports, exports, transit, transshipments, and goods tares. The second focuses on foreign trade (import/export) on one hand, and domestic traffic on the other.

The Port Authority of Valencia is made up of the ports of Valencia, Sagunto and Gandia. However, for the purposes of this handbook, the PAV will be treated as a single operating unit. Thus, traffic figures will be accumulated for the three ports, although the port the goods belong to may be indicated where relevant.

The tugboat service is considered as a port service according to article 127 of the recast text of the Spanish Law on State-owned Ports and the Merchant Navy, passed by Legislative Royal Decree 2/2011, of 5th September. It is provided when a user makes a request to the authorised service providers. Port Authorities can also make the service compulsory if they consider that exceptional circumstances put port operations or safety at risk. The Harbourmaster's Office can also declare the compulsory nature of this service for safety reasons.

Company authorised to provide the service:

U.T.E. Remolcadores Boluda, S.A. - Remolques del Mediterráneo, S.A.

2.7 TRANSPORT LINKS AND PORT MAPS

2.7.1. INTERNAL TRANSPORT LINKS AND LAND ACCESS

INTERNAL TRANSPORT LINKS AT THE PORT OF VALENCIA

Roads

The port's internal road network is formed by a main perimetric trunk road from which access roads to the various quays branch off.

The main trunk road is a dual carriageway while access roads to the various quays are single two-way roads.

The internal road layout is shown on the corresponding map.

Railways

There is a two-track railway which runs parallel to the main road, and like the road, has tracks branching off to the different quays.

Within the port area, the rail tracks are laid on a ballast bed in some parts and are embedded in concrete in others, depending on whether vehicles need to go over them or not.

The network structure is shown on the corresponding map.

LAND ACCESS AND LINKS

PORT OF VALENCIA

The Port of Valencia is directly linked to national and international road and rail networks.

By road

The Port of Valencia is connected to the A-7 and A-3 motorways and the rest of the national road network via the V-30 (Valencia bypass), providing road access to the entire Iberian Peninsula and Europe.

Access to local hinterland

- To the north, towards Sagunto, via the V-21 and the A-7 motorways.
- To the south, towards Silla, via the V-31 motorway and the CV-500 road.

Access to the following corridors

- North-South: including the A-7/AP-7/E-15 motorway from Barcelona-Algeciras, which provides access to:
The regions of Aragon, Castile-Leon and the north of Spain via the A-23 toll-free motorway at Sagunto.
- The south of Castile la Mancha, via the A-35 toll-free motorway at Jativa.
- The southern Mediterranean coast via the AP-7 toll motorway.
- East-West: mainly via the A-3 toll-free motorway (Valencia-Madrid) which leads onto the A-43 toll-free motorway to Lisbon, on the stretch near Atalaya.

By rail

Valencia's rail connections ensure access to any manufacturing area on the Iberian Peninsula and Europe.

The rail links from the Port of Valencia are as follows:

- Valencia - Barcelona - Port Bou.
- Valencia - Saragossa - Basque Country.
- Valencia - Cuenca - Madrid.
- Valencia - Albacete - Madrid. From Madrid, there are links to Extremadura and Portugal, as well as the north and northwest areas of Spain.
- Valencia - La Encina - Alicante road which also provides access to other destinations from Alcázar de San Juan (Andalusia) and Alicante (Murcia).

PORT OF SAGUNTO

By road

The Port of Sagunto is linked to the national road network via the V-23 toll-free motorway and the CV-309 road, providing access to:

- The northeast of the peninsula: from the A-23 toll-free motorway via the V-23 toll-free motorway.
- North-south corridor: the A-7 toll-free motorway from Barcelona-Algeciras which links up to the A-23 toll-free motorway.
- Valencian coast: via the V-21 toll-free motorway, from the CV-309 and the V-23 toll-free motorway.

By rail

The Port of Sagunto has rail infrastructure which connects the South Quay to the ArcelorMittal factory.

PORT OF GANDIA**By road**

The Port of Gandia is connected to the national road network via the N-337 leading onto the N-332 trunk road which then links up to:

- The AP-7/E-15 toll motorway via the Xeraco exit to the north and the Oliva exit to the south.
- The west of the Iberian Peninsula via the CV-60 road, which links up to the A-35 toll-free motorway.

By rail

The Port of Gandia also has its own internal rail infrastructure which is linked to the national rail network.

A large industrial ship, possibly a container ship or a specialized cargo vessel, is docked at a port. The ship's complex structure of masts, rigging, and cranes is visible against a hazy, golden-brown sky. In the foreground, several seagulls are captured in flight over the dark water of the harbor. The overall scene is bathed in a warm, monochromatic light, suggesting either dawn or dusk.

9. PORTS OF SAGUNTO AND GANDIA

9.1 PORT OF SAGUNTO

The Port of Sagunto is located 22 km north of the city of Valencia and has been managed by the Port Authority of Valencia since 1985, as established in Spanish Royal Decree 2100/1985, of 23rd October.

FACILITIES

1.1. COMMERCIAL DOCKS

The two commercial docks at the Port of Sagunto have a water surface of around 220 hectares, made up of 5,795 linear metres of berthing faces, distributed as follows:

	Length (m)	Depth (m)	Use
DOCK 1			
North Quay 1	489	8.50	General cargo, fertilisers, containers, and Ro-ro traffic
Centre Quay 1	620	10.10	General cargo, containers, and Ro-ro traffic
South Quay 1	583	9.50	Liquid bulk using special equipment, general cargo
Service Quay	171	4/7.50	
Northeast Quay	335	14.00	
DOCK 2			
Centre Quay 2	231	16.00	New vehicles
South Quay 2	963	16.00	New vehicles
North Quay 2	643	16.00	Containers

The Port of Sagunto has 937,573m² of open air storage space and 115,199m² of warehouse space, making a total of 1,159,449m². It also has a 65,000 m³ cold storage warehouse. It is equipped with the following cranes:

Type of crane	Number	Lifting capacity (t)
Container ships	3	40/65
Gantry	2	20
Gantry	2	36
Gantry	2	60
Gantry	2	17
Mobile	3	
Mobile	4	100
Mobile	1	104
Mobile	1	120

The South Quay is used for importing and exporting steel coil, mainly for the SIDMED iron and steel plant, and also for discharging anhydrous ammonia using special equipment for the Fertiberia fertiliser factory in Sagunto.

The North Quay is currently used for shipping fertilisers to and from this factory, and for general cargo and Ro-ro traffic.

The Centre Quay has cold storage facilities for perishable goods. It also handles fertiliser traffic, conventional general cargo, and containerised general cargo.

Intersagunto Terminal operates out of the North Quay 2, and handles Ro-ro and container operations. On South Quay 2, new vehicles are loaded and discharged, whilst natural gas is discharged at the Saggas quay.

Fishing Dock

This dock has a water surface of 13,000 m² and two 4.5 metre deep quays with berthing faces of 232 m and 120 m.

TRANSPORT LINKS

By road

The Port of Sagunto is linked to the national road network via the CV-309 and the V-23 roads. These roads lead onto the AP-7 toll motorway, N-340 trunk road and the A-23 motorway, which connect the port to the rest of the peninsula.

By rail

The Port of Sagunto's internal rail network is connected to the Arcelor Mittal plant, a company next to the port, which uses the facility. It is this plant which is connected

to the national rail network and therefore the Port of Sagunto does not have access to the public rail network.

With regard to the initiatives aimed at improving rail access to the Port of Sagunto, in 2013 a resolution of the Department of the Environment was signed on 30th December, in which an environmental impact statement for Rail Access to the Port of Sagunto was made. This is a fundamental project for the Port of Sagunto as it does not currently have its own public rail access to the national rail network, as mentioned above.

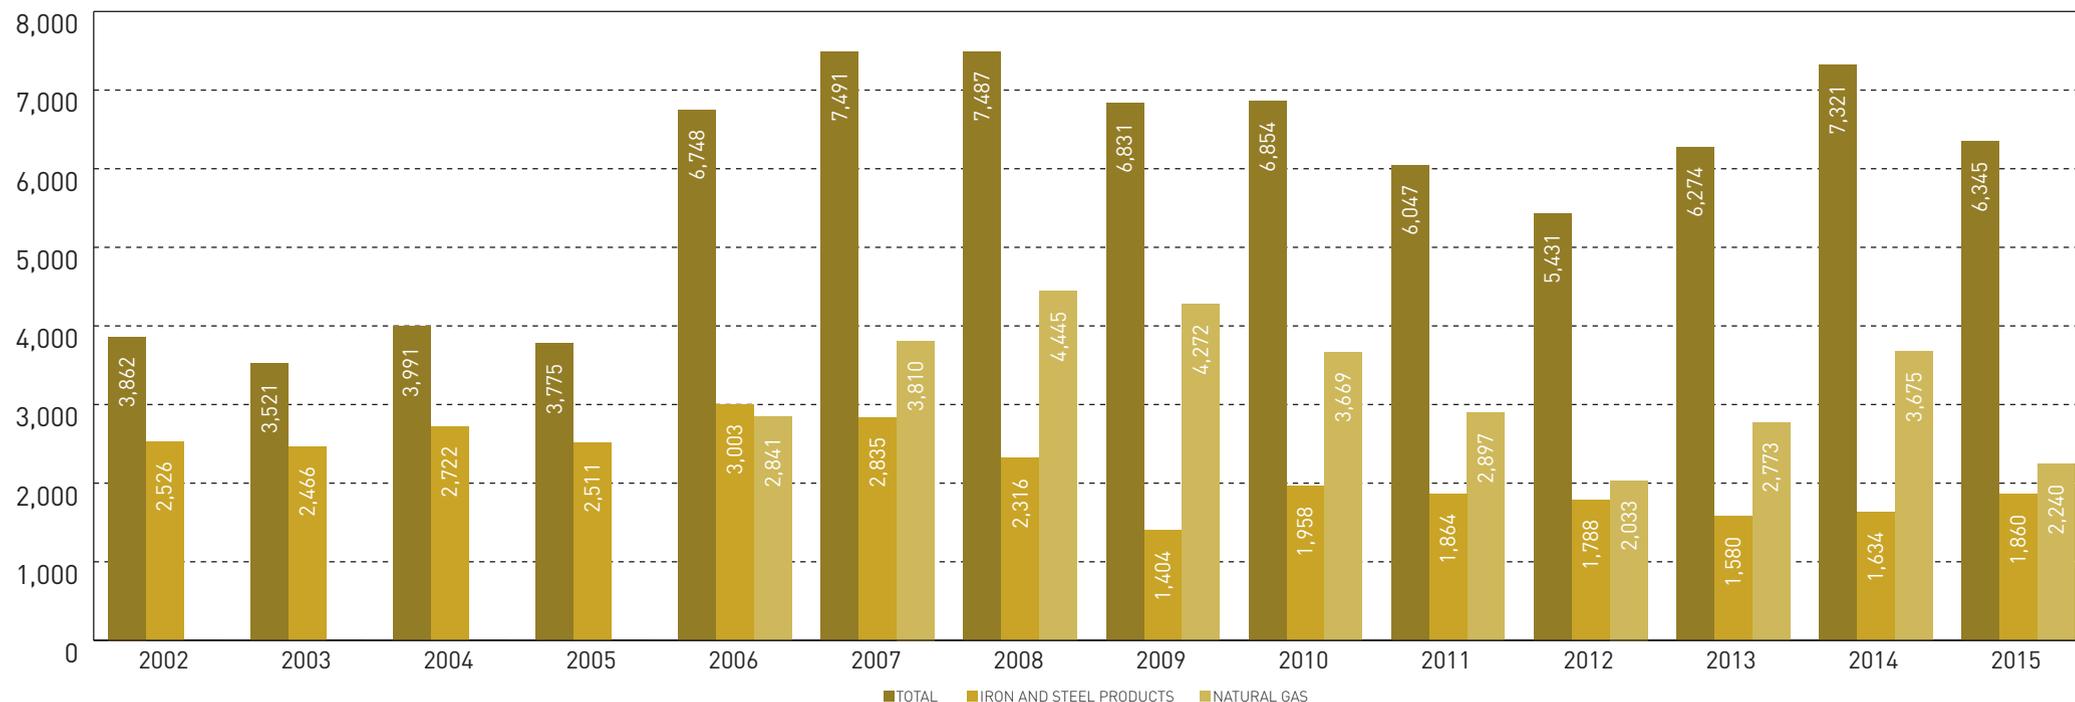

Pipeline network

The SAGGAS regasification plant facilities are linked to the Barcelona-Valencia-Bilbao gas pipeline.

Finally, the volume of fish caught stood at 238 tonnes, and supplies to vessels totalled 24,348 tonnes.

9.2 PORT OF GANDIA

The Port of Gandia is located 65 km south of the city of Valencia, and 110 km north of the city of Alicante. It has been managed by the Port Authority of Valencia since December 1985, as established in Spanish Royal Decree 2100/1985, of 23rd October.

It currently specialises in the import and handling of products such as paper in all forms (reels, pulp, etc.), chemical products, and perishable goods (refrigerated fruit) for import and export, as well as wood and wood products.

FACILITIES

Its berthing facilities are shown in the following table:

	Length (m)	Depth (m)	Use
Borgia Quay	260	5	
North Quay	125	6	Marina
Fruit Quay	285	6	Nautical services
South Quay	208	8	General cargo

Dry dock (private)	100	6.50	Dry dock

The port has 103,033 m² of storage areas of which approximately 31,583 m² is warehouse space, 66,989 m² open storage areas, and 4,461 m² roofed storage areas. These areas include a 34,000 m³ cold storage warehouse.

It is equipped with the following cranes:

Type of crane	Number	Lifting capacity (t)
Gantry	3	8
Gantry	1	12
Mobile	1	36
Mobile	1	84

TRANSPORT LINKS

By road

The Port of Gandia is linked to the N-332 via the N-337 A-road. It is linked to the AP-7 toll motorway at Xeraco (north) and Oliva (south) via the N-332 A-road. In addition to the links with various trunk roads along the coast road, the Port of Gandia is linked to its hinterland via the CV-60 road from Olleria to Grao de Gandia. It links up to the A-7 around Olleria and subsequently joins the A-35 at Llanera de Ranés, heading in the direction of Almansa, thus connecting the port to inland Spain.

Initiatives aimed at improving road access to the Port of Gandia included the publication in the Official State Gazette on 7th February 2011 of a resolution of 25th January 2011, issued by the Department of Climate Change, containing the environmental impact statement for the N-337 road project, south access to the Port of Gandia from the N-332, kilometre 200+800, Valencia province. This is an essential project for the Port of Gandia because it will enable access to the port from the N-332 trunk road, making transport links to the port easier and eliminating the need to cross the town of Gandia, via a direct link to the surrounding road network via the N-332 trunk road, which belongs to the public road network. The project was put out to tender and awarded in 2009 for €19,155,665.80 (including VAT), and was scheduled to be completed over a period of 32 months. Work began in 2015.

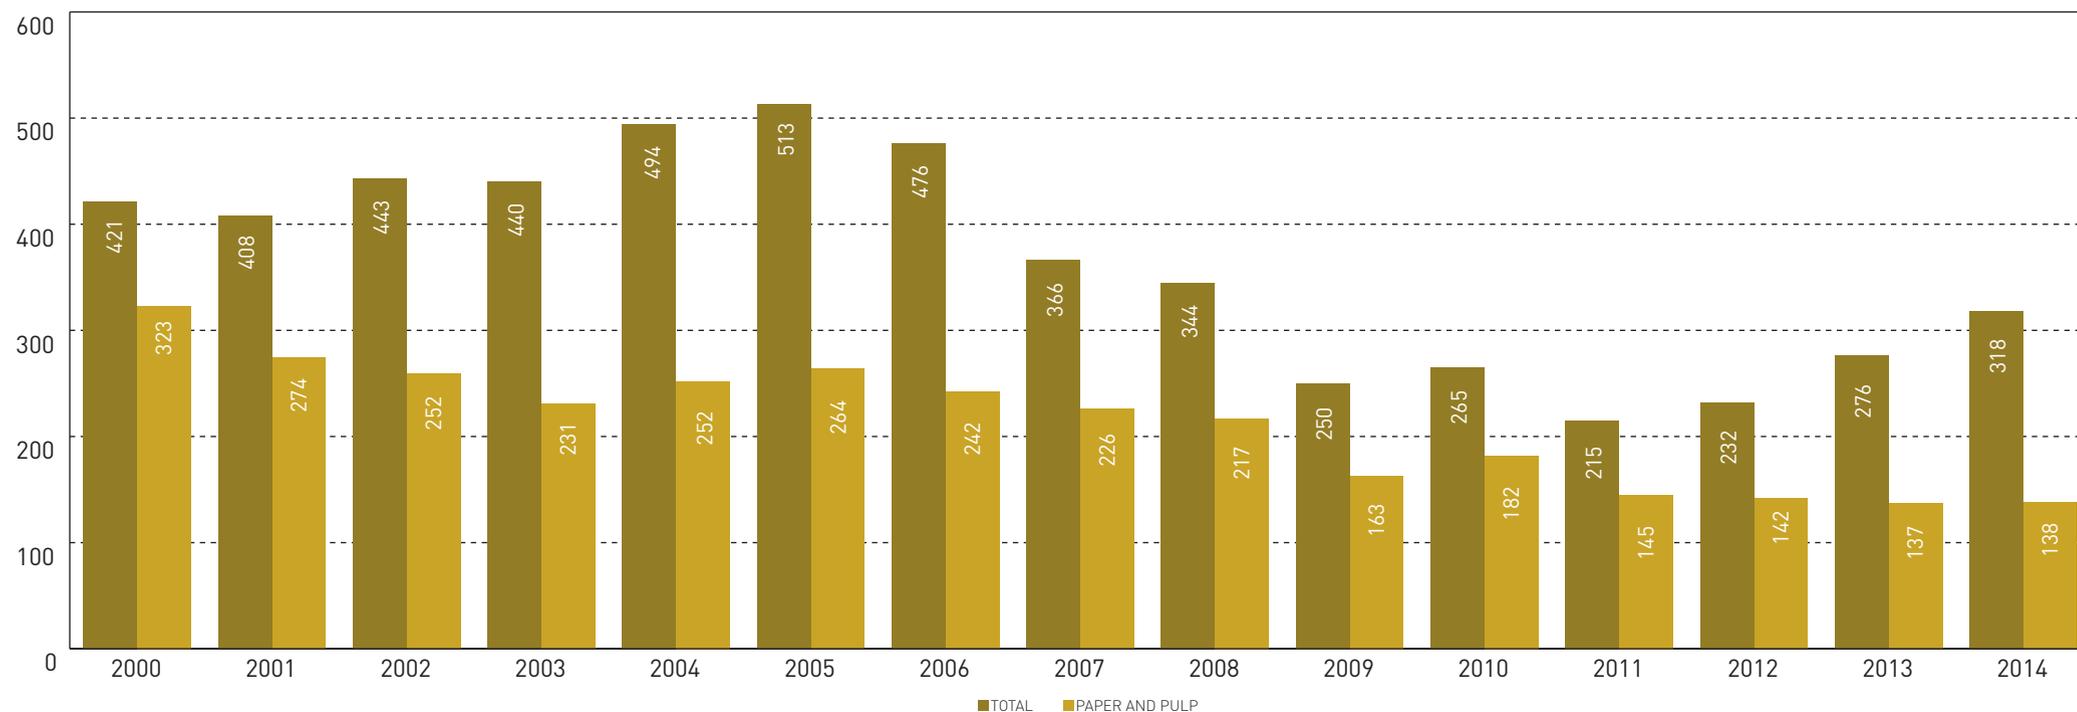

By rail

The Port of Gandia also has its own internal rail infrastructure which is linked to the national rail network.
