

14 february, World Energy Day

The first World Energy Day was celebrated more than half a century ago to raise social awareness of the importance of rational energy use.

In this spirit, APV (Valencia Port Authority) is working on:

- Renewable energy sources: wind power and photovoltaic power
- Improvements in the climate plant
- A strategic energy plan
- ISO 50001 certificate: energy efficiency
- Lighting in all our buildings will be exchanged for LEDs
- Energy contract with the certified guarantee that it is 100% renewable
