

Do you know what happens when you throw a cigarette butt away?

CONSEJOS
AMBIENTALES

#02

Filters take up to **10 years** to descompose

It can contaminate **8 litres** of sea water and up **50** of drinking water

When stepped on, they release volatile toxic substances

Birds often mistake them for food and die

By throwing lit cigarette butts, they cause fires and damage to health

The cellulose acetate they contain takes more than **100 years** to degrade

If any marine animal eats them, it dies and alters the ecological cycle
