## SÉ LA SOLUCIÓN A LA CONTAMINACIÓN DEL SUELO

5 Diciembre 2018

Although many times it is a problem that may go unnoticed, it affects us all, anywhere in the world.

The United Nations Campaign "Stop soil pollution" for 2018 aims to raise awareness among people in order to put an end to soil pollution, under the hashtag #StopSoilPollution.

Valenciaport aims to make companies of the Port Community aware of the importance of developing active soil pollution prevention policies. For this reason, it has published and distributed the booklet "CONTAMINATED SOIL".
