

Valenciaport is committed to recycling paper

ENVIRONMENTAL TIPS

#80 

Why is it important to recycle the paper and cardboard we consume?

It saves energy. Manufacturing new paper from waste paper consumes **70 % less** energy.

It saves water. Recycling one ton of paper saves **50,000 litres of water**.

Prevents the felling of trees. A ton of recycled paper avoids the felling of **17 adult trees**.

Contamination of water and soils. Much less chemicals are used in the manufacture of recycled paper.

It reduces pollution. Reduction of up to **75 %** with the manufacture of recycled paper.

Since 2010 the PAV has been replacing conventional paper with environmentally friendly paper certified by the FOREST STEWARDSHIP COUNCIL (FSC).
