

Sort your recycling: THE WASTE CYCLE

ENVIRONMENTAL
TIPS #74

Collection:

operation consisting in waste collection, including initial sorting and storage for transport to a treatment facility

Sorted collection:

collection in which waste is separated by type and nature in order to facilitate specific waste treatment.

Re-use:

any operation according to which products or components of products that aren't waste are used again with the same purpose for which they were designed.

Treatment:

waste recovery or disposal operations, including preparation prior to recovery or disposal.
