

# International Plastic Bag Free Day

is held on **3 July**, with a clear purpose:

reduce single-use plastic bags and promote their responsible use. In everyday life, plastic bags have become one of the most common everyday items and also one of the most environmentally damaging.

Around **12 million** tonnes of plastics enter the oceans every year. This waste poses a serious threat to the oceans and marine species.

The Port Community has developed a pilot project to supply water to workers, eliminating the use of plastic bottles.

This initiative is part of the **"No Plàstic"** project promoted by Ecoport Valenciaport, the Valencia Port Employment Centre and Aportem-Puerto Solidario Valencia.

ENVIRONMENTAL ADVICE **#110**
