

# New law on waste and contaminated land:

ENVIRONMENTAL  
ADVICE

# #111

closely linked to the principles of the **circular economy**. The purpose is to use every resource over and over again and to put an end to the throwaway idea.

- Reducing single-use plastics and introducing a new tax on non-reusable plastic packaging.
- Reducing the amount of food waste.
- Reducing consumption of bottled water in single-use containers.
- Reducing waste generation in the medium and long term.
- Improving separate waste collection.
- Strengthening the waste hierarchy: adopting economic instruments of administrations.
