

# How can we care for the environment?

**We all do more open-air activities in summer: getting out in the sun, going to the beach or swimming pool, a day in the mountains or sporting activities.**

Environmental messages

# #119

August 2022

In summer, the risk of wild fires is very high. Never throw away cigarette butts, matches or glass containers.

Never light fires unless expressly authorised to do so.

Always put out the fire an hour before you leave the area and make sure it has been fully extinguished.

Never leave litter behind when you go to the mountains or the beach. Always carry a bag for waste.

Use a fan. If you use air conditioning, set it to a temperature of between 24° y 26° C.

The environment doesn't take holidays!

Use the nearest recycling containers.

Be an ecotourist: travel sustainably and learn to care for the environment.

**To continue to enjoy this privilege, we must protect our environment**
