

WORLD WATER WEEK

21/27 AUGUST

The **APV**, along with the **Valenciaport Foundation**, **Puertos del Estado**, the **University of Alicante** and **SPA-RAC**, has created a working group in order to develop an early warning system to detect invasive species.

HiSea is a project of the **APV** and the **Valenciaport Foundation**, funded by the EU, that aims to develop, test and show information services that provide high-resolution data on the quality of water in the sea.
