

Saving Energy: Shine with Conscience

At the Port Authority of Valencia, we believe in taking strong actions. Small choices, like switching off lights and unplugging devices when not in use, make a significant impact. By conserving energy, we not only preserve our resources but also help to reduce carbon emissions.

- 💡 Switch off the light when no-one's in the room.
- 🔌 Unplug devices when not in use.
- ☀️ Open the curtains to make the most of the natural light.

Small changes yield big results!
