

Upping the knots on decarbonisation in maritime transport and Spanish ports

The Port Authority of Valencia is encouraging the decarbonisation and electrification of Spain's maritime sector via the Alianza Net-Zero Mar, a partnership for organisations and businesses seeking to collaborate in reducing polluting emissions generated by maritime transport and infrastructure.

ENVIRONMENTAL
MESSAGES

#126

OCTOBER 2023

Decarbonisation is a key element to a cleaner future. Here are some tips on how to be committed to the cause:

-  **Green Energy:** Use renewable sources of energy.
-  **Eco-Friendly Transport:** Choose sustainable forms of transport.
-  **Saving Energy:** Reduce energy usage.
-  **Reduce and Recycle:** Keep waste to a minimum.
-  **Education and Conscience:** Spread the word on decarbonisation issues.

Together, we can make a more sustainable and cleaner future. Join the fight!
