

# Environmental Messages for a Sustainable Winter

This December, we are going to light up our world with sustainability. From the Port Authority of Valencia we are sharing our top tip to look after the planet throughout the winter: energy saving.

- 🌲 LED Christmas lights: Make your Christmas decorations sustainable!
- 🌡️ Turn the thermostat down: Reduce the temperature by a few degrees, a small adjustment can make the difference on your bill and to carbon emissions.
- ☀️ Use natural light: Open the curtains during the day to make full use of the natural light and make sure all the doors and windows are draft free.

ENVIRONMENTAL  
MESSAGES

#128

DECEMBER 2023

Every small action counts in our commitment to a more sustainable future. This December let's adopt practices which are not only good for us, but also for the planet.
